## Experience

---

### Paytm One97 Communications | Bangalore

Software Developer | 03/2022 - Present

#### Paytm Insurance

- Led the migration of the Paytm Shop insurance app from Vue.js to React, emphasizing on modularity and device-first responsiveness and optimising performance with the implementation of redis caching , bundling , lazyloading etc.
- Conceptualized and implemented a mono repo architecture, integrating Storybook for UI modularisation, and employing Context API for data persistence in React TypeScript and implemented unit testing with jest to obtain 95% code coverage.
- Managed project timelines, tracked sprint progress,, and resolved conflicts as a Scrum Master

#### Paytm Lending

- Collaborated closely with product managers to conceptualise and led end-to-end development of Paytm EMI App frontend using React, TypeScript, Redux, and Context API. Integrated various systems like risk, bureau, banks, KYC, payment gateways and third-party lenders to facilitate seamless user onboarding. Delivered various features including foreclosure, passbook, and user flow tracking for each EMI etc.
- Engineered a robust Bank module integrating React components with backend systems, ensuring seamless user experience and error handling.
- Integrated Paytm's lending suite with premier lenders such as HeroFinCorp, Piramal, ABFL Fullerton, and Axis, driving rapid loan distribution expansion and achieving significant YoY growth in loan volumes and value.

### Dell Technologies | Bangalore

Software Engineer - 1 | 07/2020 - 03/2022

- Developed and implemented frontend features and enhanced REST API within the unified portal tool to customize user views of assets and service requests, enhancing user experience in MYS360. Utilized Angular and Spring Boot technologies.
- Designed and deployed a cloud-based vaccination slot booking portal for Dell India Team Members, incorporating single sign-on, registration, and booking functionalities with React, CSS, HTML, and Bootstrap.
- Implemented a developer portal enabling assistance requests from Dell Architects, featuring customized tags and domain-specific Architect search using React and Redux as part of the Ask Architect Council team.
- Provided production support for .NET, Angular, and SQL-based applications, reducing backlog by 15% through effective management strategies.
- Led root cause analysis and implementation of fixes for production incidents within dell.com/support portal, ensuring system stability and reliability.
